The New Mexico State Land Office (NMSLO) is looking to fill a vacancy as a District Resource Specialist in Hobbs, New Mexico.

Purpose of Position:
This position manages State Trust Land leased for the following: agricultural leasing, oil, gas and minerals development, renewable energy, and commercial development in order to optimize sustainable revenue. This position will have combined experience working in an outdoor setting with both the knowledge and/or experience in the field of agriculture and oil and gas development in order to conduct on-site lease inspections of State Trust Land, provide market based valuations and land use recommendations. This position will conduct some field monitoring and environmental assessments while analyzing complex data to develop resource management projects. This position prepares technical written reports concerning the impact of such projects and proposed leasing activities. The position interacts regularly with the public and lessees, responding to inquiries and/or requests for technical assistance related to leasing activities, land ownership and sometimes competing land uses. This position location is in Hobbs, NM and the position is a Pay Band 70, at a range of $17.01 - $29.60 hourly or $35,380.80 - $61,568.00 annually.

Minimum Qualifications:
Bachelor’s degree in Forestry, Agriculture, Ecology Soil Science, Geology, Engineering, Range Science, Biology, Environment Science, Conservation Science, Natural Resources or Watershed Management, Planning, Business Administration or Public Administration and four (4) years of experience in researching, analyzing, and monitoring land management issues in relation to existing federal, state and local laws, rules and practices and making recommendations. Must possess and maintain a valid New Mexico Driver's License.
